Professional Summary

Entry-level IT graduate currently pursuing a Master of Computer Applications (MCA), with foundational knowledge of software development, IT operations concepts, and Agile methodology. Familiar with web technologies and basic scripting through academic learning and self-study. Seeking a Trainee Associate role in AI & Engineering / IT Operations with a strong willingness to learn enterprise tools, monitoring processes, and 24x7 support workflows.

Technical Skills

- **Programming (Beginner):** Python, JavaScript

- **Web Technologies:** HTML5, CSS3, React.js (basic)

- **Backend Basics:** Node.js, Express.js (introductory level)

- **Databases:** MongoDB (basic CRUD understanding)

- **Tools:** Git, GitHub, VS Code

IT & Operations Knowledge (Foundational)

- Basic understanding of application and infrastructure monitoring concepts

- Awareness of incident lifecycle: detection, logging, escalation, and closure

- Familiarity with IT service management terminology (incidents, tickets, SLAs)

- Understanding of SOP-based workflows and documentation importance

- Introductory exposure to automation concepts using simple scripts

Academic & Self-Learning Projects

- **Web Application Development Projects**

  - Developed small-scale web applications inspired by platforms like Airbnb, E-commerce.
  - Focused on frontend structure, user flow, and basic backend logic.
  - Worked with sample datasets (100+ records) to understand scalability concepts.
  - Followed step-by-step development and testing as part of learning.

Certifications

- **Agile Fundamentals Certification** – Basics of Agile principles, Scrum framework, and sprint concepts

- **AI for Beginners Certification** – Introduction to artificial intelligence and machine learning concepts

Education

Master of Computer Applications (MCA) — Pursuing
SPPU / JSPM college of engineering   Expected Completion: 2027
Bachelor of Business Administration in Computer Applications (BBA CA)
Annasaheb Magar College, Pune   June 2021 – June 2024
CGPA: 7.27

Strengths

- Strong willingness to learn new tools and technologies

- Good analytical thinking and problem-solving approach

- Comfortable working in shift-based environments

- Effective communication and teamwork skills
